Key Point Health Services

The *Community Outreach Program* is designed to provide comprehensive psychosocial rehabilitation services to promote community integration.

One of the most important aspects of this program is that it will **provide coordination of services**. This will greatly aid clients and care providers by decreasing missed appointments, monitoring use of medications and maintaining eligibility for entitlements such as medicare and medicaid.

About Our Logo:

At Key Point we have chosen the Baltimore Clipper ship as our company symbol which reflects the rich history of our maritime area (Francis Scott KEY, Sparrows POINT) and represents pride and commitment to the people we serve.

Community Psychiatric Rehabilitation Outreach Program

Key Point Health Services has been providing rehabilitative and mental health services to persons with psychiatric disabilities for over twenty years. Our Mission is to:

Maximize the community integration of persons with psychiatric disabilities by providing quality rehabilitation services.

The outreach program's mission is to allow **individuals to function independently in their environment with the least intrusive care possible.**

Our outreach workers are experienced and skilled care providers who are specially trained to assess the needs of clients and with patient input, develop a customized plan to meet these individual needs.

This one on one working alliance between the Outreach worker and the patient assists with managing psychiatric symptoms. In addition, the program works with the patient to maintain their environment of choice.

Our Community Outreach Program supports patients in their own homes and the community by providing the following services:

- 🔑 Life skills training
- 🔑 Independence support
- 🔑 Mobility training
- 🔑 Case management (ie. housing entitlements)
- 🔑 Social events opportunities
- 🔑 Assistance with scheduling and maintaining appointments
- 🔑 Medication monitoring
- 🔑 Crisis intervention
- 🔑 Liaison and assistance with other services and care providers including hospital and physicians
- 🔑 Coordination with vocational services.

How to Start - after a physician/therapist referral is sent to the Key Point Health Service Rehabilitation Program, an outreach worker will meet with the patient, doctor or family to determine appropriate services.
