Referrals

Referrals can be made by either calling Key Point Health Services and speaking with an Intake Worker, or through the local school where Key Point is providing services. Key Point's staff will obtain information over the phone and schedule a time for a private and confidential admission interview.

Key Point participates in the public mental health system and accepts Medical Assistance and uninsured patients that meet eligibility standards.

Key Point is now accepting select private insurances and Tricare to serve our military.

About Our Logo:

At Key Point we have chosen the Baltimore Clipper ship as our company symbol which reflects the rich history of our maritime area (Francis Scott KEY, Sparrows POINT) and represents pride and commitment to the people we serve.

Reaching FOR Success

Key Point has developed programs in many schools in Central Maryland. These services are designed in collaboration with each school to best meet the needs of the particular school community.

We are pleased to provide a family-focused treatment service. Identified students and families who elect to participate receive a variety of individual, family, and group services. Our clinical staff work closely with the family to identify treatment goals and to develop a plan that meets their needs and aids with educational success. All of our confidential services are provided by licensed mental health professionals.

The students will be evaluated by a licensed child psychiatrist or certified Registered Nurse Practitioner (CRNP). The child psychiatrist or CRNP works closely with the family, the counselor, the school, and the child to provide the best course of treatment.

There are many benefits to receiving services in the school instead of a local office. These may include the following:

- Closer collaboration between the school, family, and counselor
- Increased school success
- Services attached to the local community
- Behavioral problems can be addressed in a timely fashion

A child may benefit from our services if any of the following problems are present:

- A child is sad, irritable, or depressed much of the time
- A child has difficulty sitting still, concentrating, or completing class work or homework
- A child is aggressive or violent towards themselves or others
- A child becomes withdrawn
- A child refuses to go to school or finds excuses to stay home
- A child cannot get along with peers or is rejected by them
- Family or community problems are having a negative effect on the child
